Job opportunity

Hardware Software Developer (m/f/d)

Location: ZIMMER AUSTRIA Kufstein | Digital Printing Systems

Innovation and technical progress are the strongest driving forces in our company. In our development departments, we take up overriding global trends in the field of industrial, large-format digital textile and carpet printing machine construction and develop the appropriate solutions. This gives us a leading position on the global market.

In Kufstein, we develop our own hardware and software and are looking for someone to join us. Do you enjoy solving complex technical tasks and operating large machines and systems? Do you enjoy working in a team and testing the results of your developments in practice? Then we have the right challenge for you!

Responsibilities:

- Interdisciplinary task between the areas of hardware and software
- Development of firmware (microcontrollers, FPGAs/CPLDs, soft-core)
- Development of software as test tools for electronics and test benches
- Data management and processing of large amounts of data in real time
- Data exchange with the PLC system control
- Error analysis and troubleshooting for production systems
- Implementation and support of remote maintenance

Your profile:

- You are interested in interdisciplinary work in development
- You have an HTL degree in computer science / communications engineering or similar and are looking for your first challenge
- You already have experience and are looking for a new task in development between hardware and software
- You combine a willingness to learn, personal responsibility and independence in the tasks assigned to you
- You have written and spoken English language skills (other foreign languages are an advantage)
- Reliability and the ability to work in a team round off your profile

What we offer:

- Technically highly interesting development topics
- Flexible working hours and opportunities to work partly from home
- Further training opportunities
- A flat hierarchy
- Diverse development opportunities in a small team
- Varied activities with plenty of creative freedom
- Leisure activities

In accordance with § 9 para. 2 of the Equal Treatment Act, an overpayment of the applicable collective agreement, depending
