# Basics

COLARIS-NF.PRINTER is a specially developed digital inkjet printer for high-quality, high-speed printing on narrow fabrics (textiles).

The **COLARIS-NF.**PRINTER can print on both sides of the narrow fabric in one single pass, using commercially available inks with high fastness:

- Disperse ink for printing on polyester
- Pigment ink for printing on a variety of texile surfaces.

Printing Machines

We offer 2 models of digital narrow fabric printers.

Industrial COLARIS-NF**.**MULTI PRINTER

- Double-side printing
- High processing speed (up to 50 m/min)
- Printing resolutions: 400 x 400 to 600 x 800 dpi
- Using Dimatix StarFire SG 1024 print heads
- Print head nozzle sizes: XSA, SA, MA

Applications

- Our standard model prints on all narrow fabrics with widths up to 63 mm; wider versions and parallel printing on request.
- Complete variation of ribbons, tapes, belts, pile ribbons, touch and close, zippers, velvet etc.
- Inkjet printer for decoration, lanyards, give-away products, packing, fashion, flower, satin, safety tapes etc.

Advantages of the COLARIS-NF**.**PRINTER

- Fully digital application of dyes: any shade, any pattern, any time
- Low capital investment
- Improved production efficiency: no screens, small samples are possible
- Green technology: energy and water savings
