

## Narrow Fabrics

michael.heinrich / PDF / Thu, 05/09/2019 - 12:08

## Basics

### Fully digital application of dyes | any shade, any pattern, any time

- Efficient short and sample production
- Flying color and pattern changes
- Mixed colors or patterns processed simultaneously
- Unique text or information printing capability
- Different colors or patterns on front and back with **COLARIS-NF** .

#### PRINTER

- Reduction in process complexity – any pattern/color combination in one process

### Lower capital investment

### Improved production efficiency

- Technical hotline
- Small and large lots have the same production and setup costs
- Excellent color fastness
- Reduced production loss from clean-up or pattern/color changes
- Easy to operate

### Online service and support

### Green technology – energy and water savings

- Reduced waste water contamination
- No color mixing required (CMYK)
- Fewer auxiliary chemicals required
- Reduction in process steps
