
COLARIS-NF passes baptism of fire

admin / PDF / Tue, 01/31/2017 - 00:41

At the end of January 2013, the first digital industrial printing machine COLARIS-NF was installed in northern France.

Schoutteten & Froidure from Comines (Northern France) has been a major tight weaving player in Europe since 1788!

On their of 15.000 sqm plant, Schoutteten & Froidure produces elastic and non-elastic narrow fabrics in all types of materials (PA, PES, PP, cotton, acrylic, aramid, para-aramid, Dyneema, etc.).

At the end of January 2013, the first digital industrial printing machine COLARIS-NF was installed at Schoutteten & Froidure. Within a single day the printer was installed and started up. The machine will be used for elastic and non-elastic narrow fabrics, as well as for belts.
